PROFILE

Final-year engineering student in Data Science, Big Data and AI at ENSA Agadir, seeking a final-year (PFE) internship starting February 2027, focused on Data Engineering and Artificial Intelligence (Generative AI, Computer Vision). I want to apply my skills in designing data-driven solutions, data processing and AI development to innovative projects.

EDUCATION

- **National School of Applied Sciences of Agadir (ENSA Agadir)** 2022-2027
  2024-2027 — Engineering Degree in Data Science, Big Data and Artificial Intelligence
  2022-2024 — Preparatory Classes
- **Lycee Almassira Alkhadra Massa** : Baccalaureate in Physical Sciences 2021-2022

EXPERIENCE

Final-Year Project Internship (PFA) — Data & AI Engineering | NextAct Solutions | Agadir July 2026 – September 2026

- Built SQL views and functions to expose ERP data to React dashboards (Recharts, Tailwind) and to the conversational agent.
- Developed a FastAPI AI chatbot with semantic tool selection using embeddings (multilingual-e5-small).
- Moved calculations to the database layer to make answers reliable and prevent LLM errors.
- Implemented an NL-to-SQL fallback and report export (XLSX, CSV, PDF).
- Goal: deployment on local Ollama; token reduction, column filtering and authentication caching; tests on Groq.

Data Analyst Intern | Appbase | Agadir July 2025 – August 2025

- Developed a full-stack Streamlit application (4 modules) for project portfolio management and analysis.
- Created an interactive dashboard with 10+ Plotly visualizations (Gantt, scatter, boxplot, pie) and dynamic multi-criteria filters.
- Designed a statistical project duration estimator (median + P25–P75) based on historical data, with automatic constraint relaxation.

PROJECTS

- **Smart Irrigation & MLOps (team of 5, Industrial ML module) — Python, Scikit-learn, XGBoost, MLflow, DVC, FastAPI, React**
  Predicts crop water needs and the daily volume to apply (FAO method), to stop irrigation by habit; I built the DVC data pipeline, the Random Forest tracked in MLflow, and the FastAPI backend.
  5 models compared (best accuracy 94.3%); a feedback loop logs farmer-reported errors for retraining.
- **Logistics ETL Pipeline & Data Warehouse — Pentaho, MySQL, Power BI**
  ETL pipeline loading logistics data into a data warehouse, with Power BI dashboards to analyze delivery delays.
- **HR Management System (team of 3) — Oracle, PL/SQL, FastAPI, React, Tailwind**
  Replaces scattered HR files with a 19-table Oracle database, 20 functions and 25 PL/SQL procedures for business rules, plus a REST API.
  4 roles with least-privilege access; every salary, assignment and contract change is logged automatically by audit triggers.

TECHNICAL SKILLS

- **Languages & Databases:** Python, SQL, PL/SQL, MySQL, PostgreSQL, Oracle SQL Developer
- **Data, ML & Computer Vision:** Pandas, NumPy, Scikit-learn, TensorFlow/Keras, OpenCV, CNN
- **Generative AI & Data Engineering:** LLMs (Groq, Ollama), embeddings, RAG, function calling, ETL/ELT, PySpark
- **Visualization & Tools:** Streamlit, Matplotlib, Seaborn, Git/GitHub, Jupyter, Swagger

CURRENTLY LEARNING

Tools being learned and applied in an ongoing academic IoT project (in progress): Apache Kafka, Apache Spark, Apache Airflow, Docker, Kubernetes, Terraform

LANGUAGES & CERTIFICATIONS

Languages: Arabic (native), French (advanced), English (intermediate)
Certifications: DataCamp — Data Analyst in Python, Intermediate SQL, dbt Fundamentals
